AHD MR260
260° Pedestrian Detection

260° PEDESTRIAN DETECTION SOLUTION TO ENHANCE SAFETY

- **260° detection** around mobile equipment: forklifts, excavators, loaders, etc.
- **Easy & quick installation**
- The only industrial-grade AI camera able **to detect and localize pedestrians in real time**
- Alerts the driver to danger and helps to **prevent serious accidents** on industrial sites
- Detects **any posture** (standing, crouching, partial view) to prevent collisions with forklifts / heavy equipment, whether **driving forward or in reverse**

### INCREASED PRODUCTIVITY & BETTER WORKING CONDITIONS

- Generates **only relevant alerts** for the driver, avoiding nuisance alarms and alarm fatigue
- **Avoids** incurring **costs** related to downtime, workplace accidents or fatalities

---

7" waterfroof display

- The operator knows exactly where the pedestrian is
- The detected pedestrian can also be alerted by an audible and visual alarm directed towards him/her
