

## AHD MR520

### 360° Pedestrian Detection

#### 360° PEDESTRIAN DETECTION SOLUTION TO ENHANCE SAFETY

- **360° detection** around mobile equipment: excavators, loaders, etc.
- **Video recording: 10" display** with a **storage capacity of 250 hours** per camera
- The only industrial-grade AI camera able to **detect and localize pedestrians in real time**
- Alerts the driver to danger and helps to **prevent serious accidents** on industrial sites
- Detects **any posture** (standing, crouching, partial view) to prevent collisions with forklifts / heavy equipment, whether **driving forward or in reverse**

#### INCREASED PRODUCTIVITY & BETTER WORKING CONDITIONS

- Generates **only relevant alerts** for the driver, avoiding nuisance alarms and alarm fatigue
- **Avoids** incurring **costs** related to downtime, workplace accidents or fatalities

#### 10" display with the view of the 4 cameras

- The operator knows exactly where the pedestrian is
- The detected pedestrian can also be alerted by an audible and visual alarm directed towards him/her
- Video recording
