AI Camera Software Update Procedure

Video Tutorial

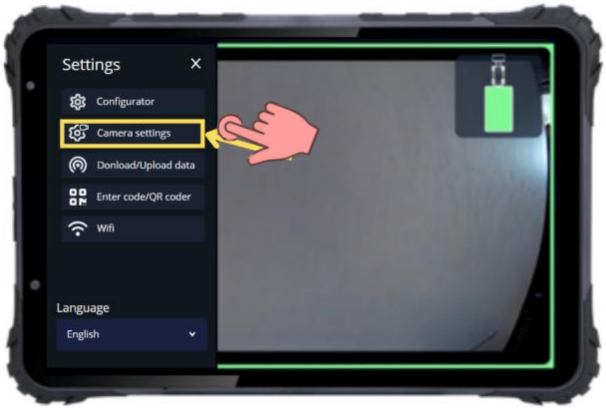

METHOD 1 — Via the Blaxtair Smart Display

Prerequisites: Smart display connected via 4G or Wi-Fi.
A zoning license must be activated on the system.
For the **Zoning** feature, **version 2.2rc3 or higher** is required for the camera, and **version v3.1.3 or higher** is required for the smart display.

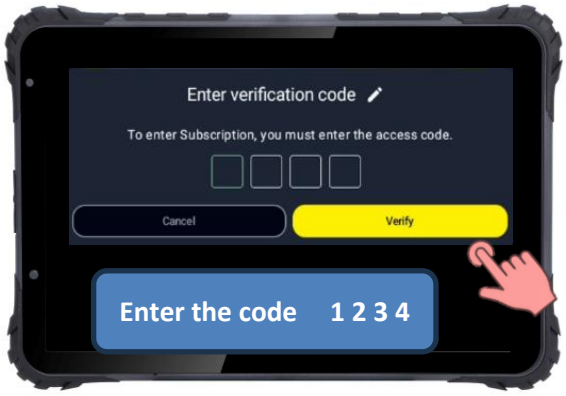

1 On the Smart Screen, tap “Settings”.

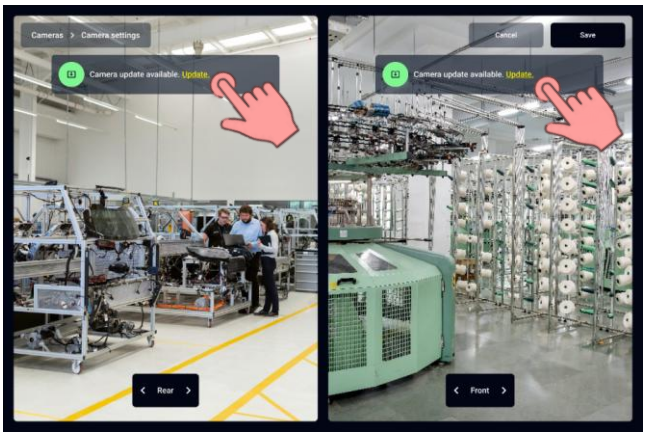

2 Open “Camera Settings”.

3 Enter the camera password.

4 If an update is available, tap “Update”.

Keep the system powered on until the installation is complete.
Once the installation is complete, switch the vehicle off and back on. Then go to “Camera Settings” and check that no further update is available.
This procedure must be carried out separately for each camera, one at a time.

Having difficulties with this first method? Use METHOD 2 on the reverse side.

BLAXTAIR®

METHOD 2 — Via the Blaxtair App

Video Tutorial:

Prerequisites: Blaxtair app on your phone (Android, iOS) + Blaxtair account
A zoning license must be activated on the system.
For the Zoning feature, **version 2.2rc3** is required for the camera, and **version v3.1.3** is required for the smart display.

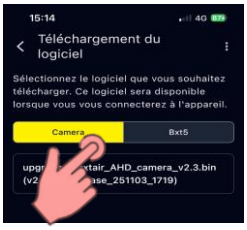

1 In the Blaxtair app on your phone, tap "..." in the top right corner.

2 Select "Update".

3 Select "Camera", then download the desired version locally to your phone.

4 On the **Blaxtair screen:** Settings > Download data > code 1235. A QR code will be displayed.

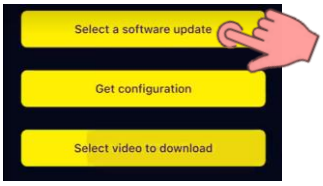

5 **On the phone: in the app**, tap "Connect to a device", then scan the QR code.

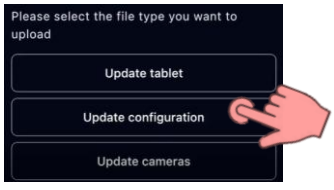

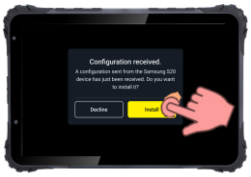

6 Select "Select a software update".

7 Select "Cameras", then the **downloaded file**.

8 On the tablet, tap "INSTALL". The installation will start.

The phone can be disconnected as soon as the process starts. **Keep the system powered on until the installation is complete. It will restart automatically once the installation is complete.**
Once the installation is complete, switch the vehicle off and back on. Go to System Information to check that the new camera software version has been taken into account.
