Smart Screen Software Update Procedure

Video Tutorial

METHOD **Via the Blaxtair App**

Prerequisites: Blaxtair app on your phone (Android, iOS) + Blaxtair account
For the **Zoning** feature, **version 2.2rc3 or higher** is required for the camera, and **version v3.1.3 or higher** is required for the smart display.

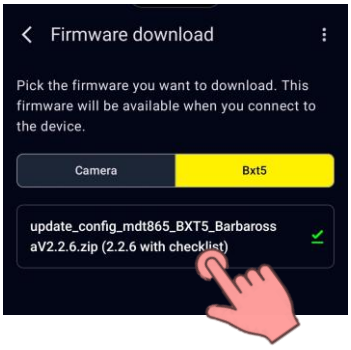

1 In the Blaxtair app on your phone, tap "..." in the top right corner.

2 Select "Update".

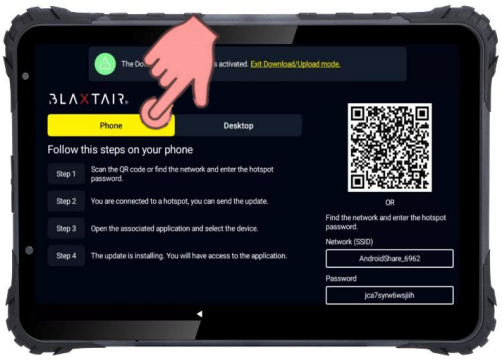

3 Select "BXT5", then **download the desired version locally.**

You will need to create a new folder to save the file.

4 **<u>On the Blaxtair screen</u>**, tap:
Settings > Download data > code 1235.

Procedure continued on the reverse side: steps 5 to 8.

METHOD — **Via the Blaxtair App — continued**

5 **<u>On the phone:</u>**
Open the app and scan the QR code displayed on the Blaxtair screen.

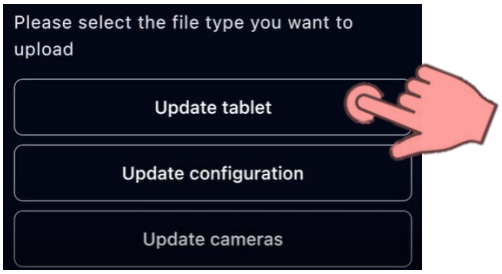

6 Select “Select a software update”.

7 Select “Update tablet”.
Then select the previously downloaded file from the folder on your phone to start the update.

8 On the tablet, tap “INSTALL”.
The installation will start.

The phone can be disconnected once the installation has started.
Keep the system powered on until the installation is complete.
The system will restart automatically once the installation is complete.
It is recommended to switch the vehicle off and back on once the installation is complete. Then check the software version by going to “System Information”.
